

DUTY SERIES

RELIABLE, MISSION READY FIREARMS
BUILT FOR EVERYDAY SERVICE USE WITH
PROVEN PERFORMANCE AND DURABILITY
FEATURING THE DT™ GAS BLOCK AND GAS TUBE

The **CQTWS DUTY SERIES** is a precision made combat rifle. It features a full length, free float handguard with M-Lok mounting system and exact torque barrel nut. This process helps ensure the accuracy and repeatability of the **CQTWS DUTY SERIES** in the manufacturing / assembly process. This weapon system was developed at the request of multiple governments to improve on the existing offerings in the marketplace. Improvements included a precision CNC machined Barrel that utilizes the latest in manufacturing process to ensure a more consistent and accurate barrel with extended life span. High quality, US sourced raw materials enable CQTWS to manufacture in house to exact standards and uphold the highest quality. CQTWS is not beholden to OEM suppliers and outsourcing production like most of the industry due to being vertically integrated in the manufacturing process. The CQT15 is chambered to fire the 5.56mm cartridge. It is a select fire rifle having semi-automatic and three-round-burst fire capabilities. Cartridges are magazine fed, and firing is achieved via a direct impingement gas operating system.

DUTY SERIES CQT15 & CQT30 Technical Specs

- **CALIBER:** 5.56mm or 300 Blackout
- **MAG CAPACITY:** 30 Rd.
- **5.56 BARREL LENGTH:** 16", 11.5", 10.5", 7.5"
- **300 BLACKOUT BARREL LENGTH:** 8"

- **OPERATION:** Direct impingement
- **WEIGHT:** 6.3 lb.
- **OVERALL LENGTH:** 28.5" - 36"

PRIMARY FEATURES

- CQTWS Lightweight handguard with continuous 12 o'clock Picatinny rail space, multiple M-LOK slots at 3, 6 and 9 o'clock.
- CQTWS MIL-B-11595E 4150 Steel, Turned Ground and Polished, stress relieved. Nitrided and hardened to 58 rockwell for long barrel life.
- M16-style MIL-SPEC bolt carrier group and HPT/MPI-tested bolt made from 9310.
- CQTWS Proprietary DT™ Gas System.

BARREL

- Machined from MIL-B-11595E 4150 4150 TGP Steel pre and post stress relieved, Nitrided and hardened to a 58 rockwell. 1:7 twist.
- The latest manufacturing process to ensure minimal stress induced into the steel. All CQTWS barrels are precision CNC machined, and then hand chambered to ensure maximum accuracy.
- High Pressure tested.
- A2-style muzzle device.

RECEIVERS

- MIL-SPEC forged 7075 T651 aluminum receiver in black Cerakote™ or Type III Anodized.
- CQTWS Proprietary DT™ Gas to ensure zero failures from inefficient and thin standard gas systems.
- Lower parts kit machined from 304 Stainless and black oxide for strength, longevity and rust-free operation.
- Comes with CQTWS 304 Stainless Extended Pivot and Take down pins.
- M16-style bolt carrier group made from 8620 steel.
- HPT/MPI-tested and certified bolt made from 9310 Tool Steel.
- Gas keys properly sealed, torqued and staked according to MIL-SPEC.

HANDGUARD

- CQTWS aluminum handguard with continuous 12 o'clock Picatinny rail space, extruded from 6051 Aluminum for strength and weight savings, CQTWS profile and exact torque barrel nut. Multiple M-LOK slots at 3, 6 and 9 o'clock.

OPERATING CONTROLS

- Standard Mil-SPEC control group.
- Mil-SPEC Charging handle.
- MIL-SPEC-style magazine and bolt release.

Made in the U.S.A.
