CQTWS MUZZLE DEVICES

CQT Weapon Systems muzzle devices are manufactured out of 4140. Our line of muzzle devices are designed to reduce muzzle blast and rise. The two piece design allows the ability to interchange inserts. Each insert is designed to provide a unique shooting experience. The “Blast Cone” insert is a true disruption design. While the “Linear” insert is meant for a very smooth linear dispersing of gases. Each insert reduces or eliminates the blow back and pressure felt on the shooter while keeping the gun level. Three unique designs are available in 1/2-28 and 5/8-24 threads, Cabalistic, Arcane and Hugger-Mugger.
